- Hospital Management System
- Recruitment and Applicant Tracking System
- Mobile Application & Website Development
- Customized System Development
- Cloud Signage Solution
- Cloud Services
- BPO Services
- Managed Services

ERP SYSTEM DEVELOPMENT

- **Integrated Platform:** Combines various business processes and functions into a single system.
- **Centralized Database:** Stores all data in one location for easy access and reliability.
- **Modules:** Divided into modules (e.g., finance, human resources, inventory) that can be integrated or used independently.
- **Standardized Processes:** Implements standardized workflows and procedures across departments.
- **Real-time Updates:** Provides real-time data and analytics for informed decision-making.
- **Improved Efficiency:** Automates repetitive tasks, reducing manual effort and errors.
- **Enhanced Collaboration:** Facilitates communication and collaboration between departments.
- **Scalability:** Can scale with business growth and accommodate additional functionalities.
- **Customizable:** Allows for customization to meet specific business needs.
- **Security Features:** Implements security measures to protect sensitive data.
- **Reporting and Analysis:** Generates reports and analytics to monitor performance and trends.
- **Supports Compliance:** Helps adhere to industry regulations and standards.

INVENTORY MANAGEMENT SYSTEM

- Inventory control and supply chain management module optimizes inventory processes.
- Tracks inventory levels and monitors stock movements.
- Streamlines procurement processes from purchase to fulfillment.
- Key features include inventory tracking, order management, replenishment planning, and vendor management.
- Provides real-time visibility into inventory status.
- Automates inventory-related processes for efficiency.
- Minimizes stockouts and reduces carrying costs.
- Enhances overall operational efficiency through streamlined inventory management.

POINT OF SALES (POS) SYSTEM

- Dynamic dashboard with real-time insights
- Product management capabilities
- Easy quotation creation and management
- Recording sales and purchases
- Comprehensive reporting functionality
- Efficient product scanning for quick transactions
- User-friendly interface
- Customizable settings
- Integration capabilities with other systems
- Security features to protect data

SUPPLY CHAIN MANAGEMENT SYSTEM

- SCM optimizes the flow of goods and services from procurement to delivery.
- Streamlines processes like sourcing, production, inventory management, and logistics.
- Focuses on improving efficiency and meeting customer demands.
- Key features include demand forecasting, supplier management, production planning, and transportation optimization.
- Enhances visibility across the supply chain.
- Reduces lead times and minimizes costs.
- Aims to achieve overall improvement in supply chain performance and responsiveness.

HUMAN RESOURCE INFORMATION SYSTEM (HRIS)

- ERP's HRIS streamlines HR tasks and strengthens workforce management.
- Efficiently manages employee data, attendance, and payroll.
- Ensures compliance and accuracy in HR operations.
- Automates processes like payroll and leave management, reducing administrative burdens.
- Facilitates regulatory adherence.
- Provides valuable insights into workforce trends for strategic decision-making.
- The integrated mobile app enables attendance tracking, leave requests, and daily sales reporting.
- Enhances team productivity and efficiency through streamlined processes and mobile accessibility.

FINANCE MANAGEMENT SYSTEM

- FMS ensures financial compliance and optimizes processes.
- Manages accounts payable, accounts receivable, budgeting, financial reporting, and analysis.
- Facilitates informed business decisions and drives profitability.
- Key features include financial forecasting, expense management, asset tracking, and compliance monitoring.
- Provides real-time insights into financial performance.
- Enables effective resource management and risk mitigation.

PRODUCTION PLANNING SYSTEM

- PPS plans and schedules production activities effectively.
- Aligns production processes with demand forecasts.
- Optimizes resource allocation and minimizes production bottlenecks.
- Key features include capacity planning, material requirements planning, scheduling, and shop floor control.
- Ensures efficient use of resources.
- Reduces lead times and enhances product quality.

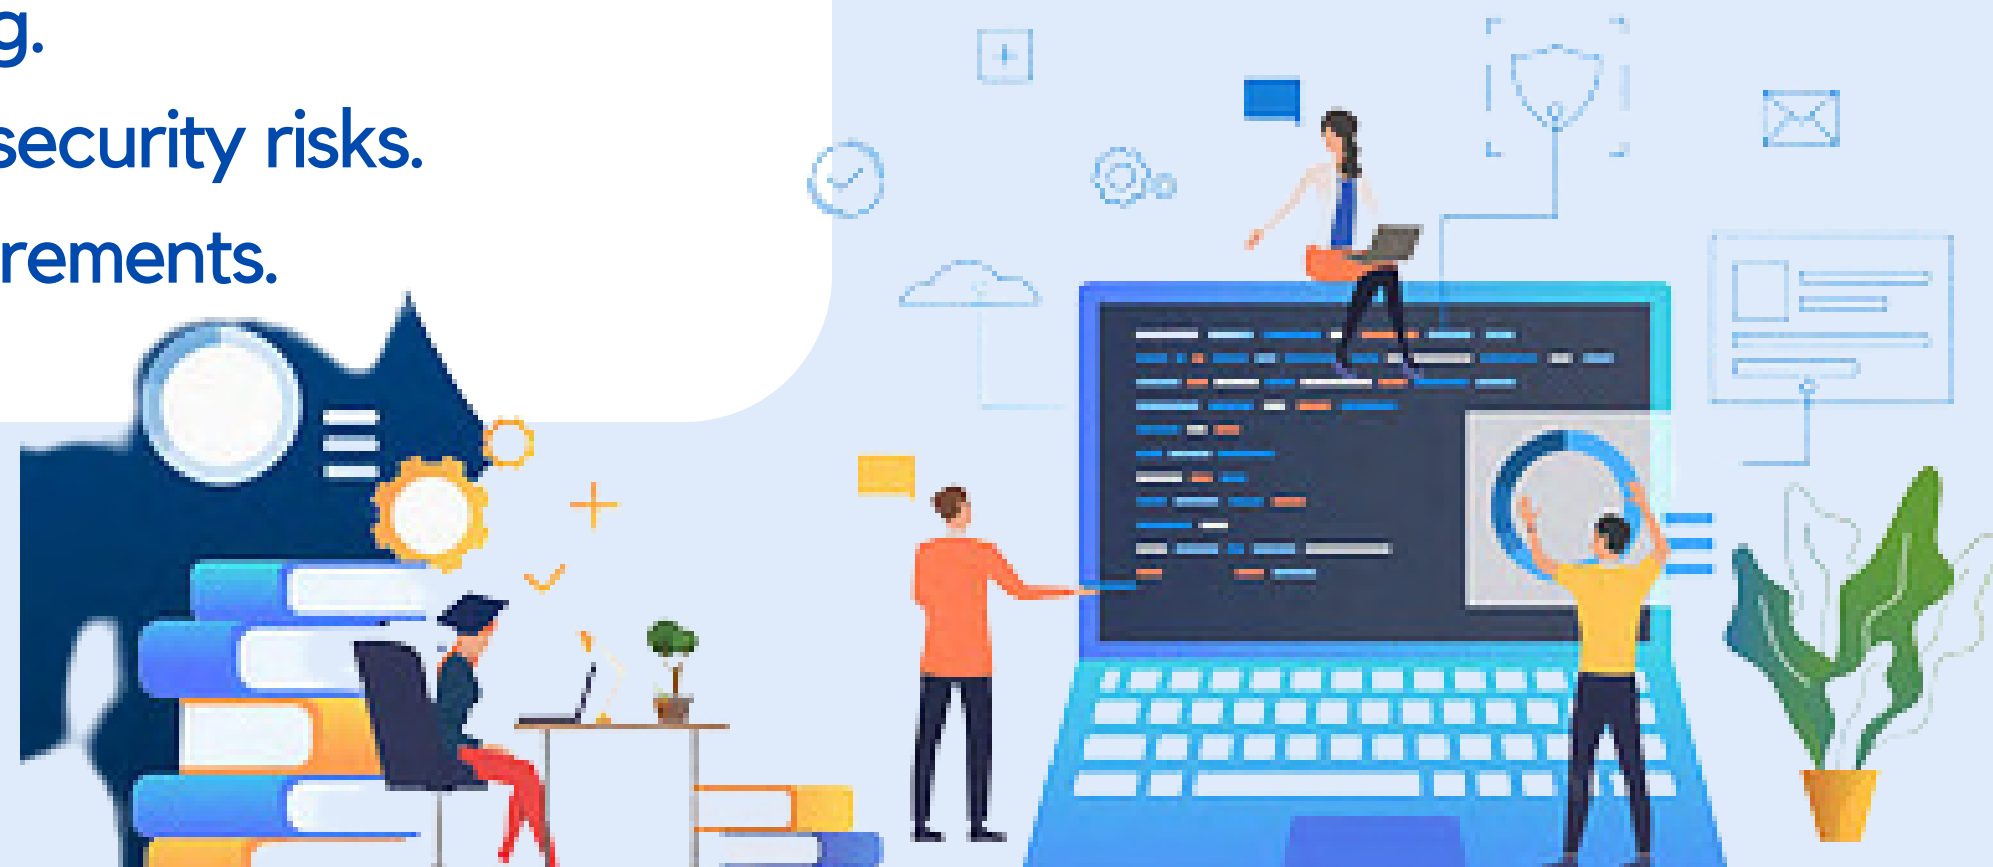

QUALITY CONTROL & AUDIT SYSTEM

- QCAS ensures product quality and regulatory compliance.
- Implements quality management processes and conducts audits.
- Manages non-conformances to maintain high-quality standards.
- Key features include quality planning, inspection, corrective actions, and compliance tracking.
- Improves product reliability and enhances customer satisfaction.
- Reduces risks associated with non-compliance.

ADMINISTRATION SYSTEM

- Manages system configuration, user roles, and security.
- Configures system settings and controls user access.
- Monitors system performance to ensure data integrity, security, and reliability.
- Key features include user management, role-based access control, audit trails, and system monitoring.
- Safeguards sensitive data and mitigates security risks.
- Ensures compliance with regulatory requirements.

DOCUMENT MANAGEMENT SYSTEM

- Document Management System (DMS) simplifies document and file management within the organization.
- Features include document storage, version control, access control, and document sharing.
- Empowers team collaboration and access to critical information.
- Improves productivity and efficiency by facilitating easier document management and retrieval.

TRANSPOTATION SYSTEM

- **Enhanced Customer Experience:**
Ensure service reliability and real-time updates.
- **Tailored Solutions for Industries:**
Customizable for transportation, logistics, and public transit.
- **Operational Efficiency:**
Automation and data-driven insights to reduce costs.
- **Compliance and Safety:**
Adhere to regulations and enhance safety standards.
- **Scalable and Integrated Platform:**
Grow with business needs and integrate with existing systems.

VEHICLE PARKING MANAGEMENT

- Efficiently manage parking spaces and resources.
- Implement electronic ticketing systems.

REAL-TIME VEHICLE TRACKING

- Track vehicles using GPS technology.
- Monitor fleet movement for operational control.

OPTIMIZED FLEET MANAGEMENT

- Streamline operations for transportation companies.
- Improve route efficiency and scheduling.

ELECTRONIC TICKETING SYSTEM

- Digital ticketing solution eliminates the need for paper tickets.
- Provides secure and contactless transactions.
- Offers customizable ticket options for various events and services.
- Streamlines the ticketing process for events, transportation services, and more.
- Seamlessly integrates with existing systems.
- Enhances efficiency and reduces costs.
- Improves the overall experience for both customers and staff.

HOSPITAL MANAGEMENT SYSTEM

- Hospital Management System optimizes healthcare delivery and improves patient care.
- Comprehensive solution covering patient registration, appointment scheduling, EHR, billing, invoicing, and inventory management.
- Features clinical decision support, interoperability, and analytics.
- Empowers healthcare providers to deliver high-quality care.
- Enhances operational efficiency and improves patient outcomes.
- Streamlines hospital operations for better management.
- Facilitates easy access to patient information and records.
- Supports decision-making through analytics and clinical decision support tools.

RECRUITMENT & APPLICANT TRACKING SYSTEM

APPLICATION GATHERING SYSTEM

- JobArcade Application Gathering System simplifies job application management.
- Features effortless application submission and real-time tracking.
- Offers customized forms for employers and provides a user-friendly experience for job seekers.
- Streamlines communication between employers and job seekers.
- Provides a secure and efficient solution to connect top talent with opportunities.
- Initiates the journey towards efficient job application management.

FOREIGN EMPLOYMENT AGENCY SYSTEM

- The Foreign Employment Agency System streamlines international job seeking.
- Offers a vast database of global job listings.
- Simplifies overseas job applications and provides application tracking.
- Manages crucial documents and offers pre-departure resources.
- Ensures data security throughout the process.
- Trusted partner for individuals pursuing work abroad.
- Facilitates turning dreams into reality, regardless of the chosen foreign employment company.
- Initiates the international career journey for job seekers.

MOBILE APPLICATION & WEBSITE DEVELOPMENT

- **Custom Mobile App Development:**

- Tailored apps for iOS and Android platforms.
 - User-friendly interfaces to boost engagement.

- **Mobile Game Development:**

- Interactive games with captivating designs.

- **Responsive Website Design:**

- Websites optimized for all devices.
 - Enhance user experience and conversions.

- **Targeted Audience Engagement:**

- Reach and connect effectively with your audience.

- **Conversion-focused Solutions:**

- Drive conversions and user retention.

- **Experienced Development Team:**

- Benefit from skilled and innovative developers.

RESTAURANT MANAGEMENT SYSTEM

- Restaurant Management System enhances customer experience and streamlines order management.
- Suitable for restaurants, retail stores, or e-commerce businesses.
- Enables online order acceptance, inventory management, and seamless payment processing.
- Offers customizable menus to cater to specific business needs.
- Facilitates order tracking for both customers and businesses.
- Integrates smoothly with existing POS systems.
- Helps increase sales, reduce errors, and improve customer satisfaction.
- Enhances overall efficiency in order management processes.

EVENT MANAGEMENT SYSTEM

- Registration System simplifies registration processes.
- Suitable for events, memberships, courses, or programs.
- Simplifies the process for both organizers and participants.
- Offers customizable registration forms.
- Provides secure payment processing.
- Facilitates real-time reporting for efficient management.
- Ensures a seamless experience for attendees.
- Streamlines registration management for various purposes.

TRAVEL & TOURISM SYSTEM

- Travel & Tourism System caters to the unique needs of businesses in the travel and hospitality industry.
- Provides a comprehensive solution for travel agencies, tour operators, and hospitality providers.
- Manages booking, itinerary planning, customer relationship, and reporting.
- Offers features like online booking, reservation management, and customer feedback.
- Enables businesses to deliver exceptional experiences to guests and travelers.
- Streamlines operations for enhanced efficiency and customer satisfaction.
- Facilitates seamless management of bookings and itineraries.
- Enhances customer relationship management and reporting processes.

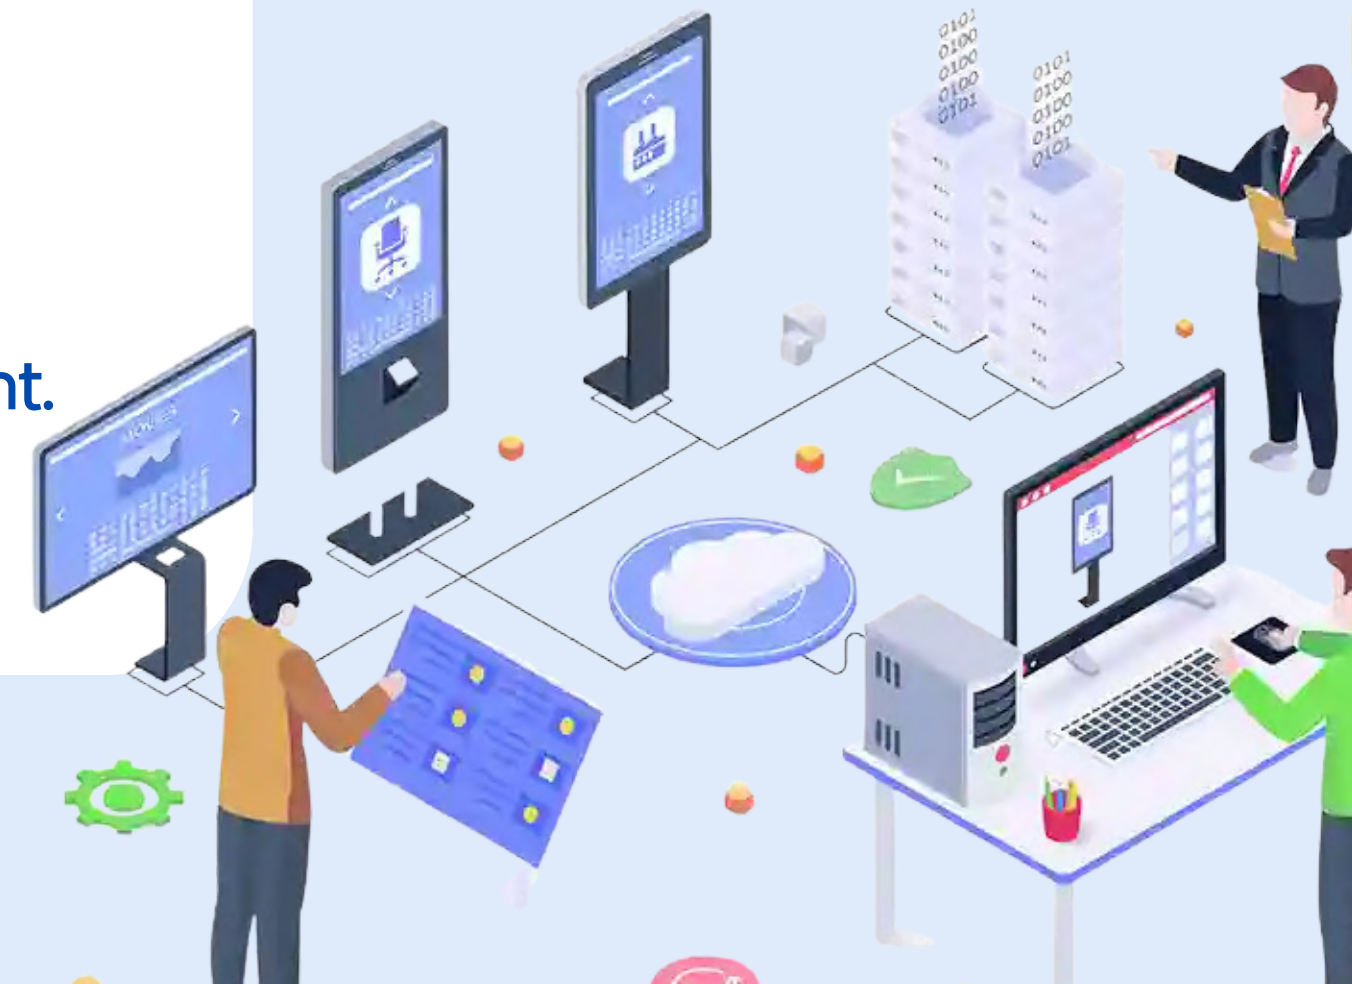

CLOUD SOLUTIONS

- All-encompassing range of cloud computing services tailored to unique business requirements.
- Smooth and efficient migration services to transition to the cloud seamlessly.
- Sophisticated management and monitoring of cloud infrastructure.
- Dedicated to providing solutions that allow harnessing the full power of the cloud.
- Ensures businesses can leverage the cloud to its fullest extent.
- Offers comprehensive support for various cloud computing needs.
- Customized solutions for optimal performance and efficiency.
- Facilitates seamless integration and management of cloud resources.

CLOUD SIGNAGE SOLUTION

- Cloud Signage Solution: Revolutionize digital signage experience with our cloud-based platform.
- Centrally manage and update digital displays across multiple locations.
- Ensures consistent branding and messaging throughout.
- Features remote content management, scheduling, and analytics.
- Empowers delivery of targeted and engaging content to audience.
- Drives customer engagement and enhances brand awareness.
- Offers comprehensive tools for effective digital signage management.
- Facilitates data-driven decisions through analytics and insights.

BPO SERVICES

- Call Center Solutions: Unlock business potential with our top-tier call center solutions.
- Talentfort Pvt Ltd specializes in revolutionizing the BPO industry.
- Tailored programs enhance customer satisfaction and bolster client retention.
- Provides 24x7 call center services onsite and offsite.
- Helps businesses thrive in competitive landscapes.
- Payroll Outsourcing: Comprehensive services including payroll calculation, tax withholding, and compliance reporting.
- Guarantees reliability and precision with quality control measures and audits.
- Revolutionize payroll management with our outsourcing solutions.
